SUMMARY

Fintech engineering and product leader with 7+ years of experience scaling high-performing engineering teams, merchant systems, and technical communities across fintech and technology. Scaled engineering teams from 1 to 9, supported \$10B+ in enterprise GMV, and drove \$500K in incremental GMV through high-stakes technical initiatives. Combines software engineering, GenAI agentic workflows, and an empathetic, high-velocity managerial style to build scalable products, eliminate operational toil, and unleash engineering flow. Targeting Engineering Management and Technical Product Leadership roles.

PROFESSIONAL EXPERIENCE

Founder | [Beginner](#)

📍 San Diego, CA (Hybrid) | Mar 2026 – Jul 2026

Role Scope & Scale: Founded early-stage developer product venture; led product discovery, full-stack engineering (React, Next.js), and GTM for a fundraising pitch simulator, acquiring initial paying users within 6 weeks and building a 20+ engineer community.

- **Community Architecture:** Established a developer and founder network across SoCal, NYC, and SF.
- **Customer Discovery:** Conducted 40+ user research interviews with developers and technical founders and iterated on product features on-the-go and in real-time.

Software Engineering Manager (L7), Merchant Advocacy | [Affirm](#)

📍 San Diego, CA (Remote) | Mar 2025 – Feb 2026

Role Scope & Scale: Managed 6 software engineers with cross-functional leadership across Product, Design, and Content; owned affirm.com and merchant portal infrastructure (React, TypeScript) supporting 500,000+ active merchants, delivering an incremental \$500K GMV lift ahead of BFCM 2025.

- **Top-of-Funnel Revamp & \$500K GMV:** Directed 5-week website revamp of affirm.com, unifying engineering and product marketing to launch native customer onboarding funnels and mobile conversion, capturing an incremental \$500K GMV ahead of BFCM 2025.
- **Incident Root-Cause & Velocity Labs:** Diagnosed legacy software driving recurring production incidents; instituted weekly "Velocity Lab" working sessions to upskill engineers in AI tooling, empowering the team to solve problems more thoroughly, move faster, own more of the stack, and stabilize the merchant portal at 99.9% uptime.
- **Domain Architecture & Boundary Mediation:** Mediated technical RFCs and decoupled service boundaries across Staff+ and Director levels as part of a multi-org initiative, aligning merchant systems with the enterprise domain architecture to lay the groundwork for 99.99% availability.

Developer Support Engineering Manager (L6 → L7), Partner Engineering | [Affirm](#)

📍 San Diego, CA (Remote) | Jul 2021 – Mar 2025

Role Scope & Scale: Promoted from L6 to L7 to build, scale, and lead the developer support engineering team from 1 to 9 engineers; managed technical operations and SLA reliability across strategic accounts (\$100M+ GMV) and Affirm's flagship partner (Amazon, \$10B+ GMV).

- **Automated SLA Telemetry & Operations:** Architected automated SLA reporting and root-cause summaries (Python, Flask, Snowflake), eliminating 16 hours of monthly manual toil, systemizing 80% of workflows, and distributing Tier-1/Tier-2 operational load.
- **DevOps Observability & Incident Response:** Established real-time telemetry dashboards and automated incident alert routing, decreasing MTTR for enterprise partner incidents by hours.

Developer Support Engineer (L4 → L5), Partner Engineering | Affirm

San Francisco, CA (Hybrid) | Sept 2019 – Jul 2021

Role Scope & Scale: Promoted from L4 to L5, serving as primary technical liaison for 300+ SMB merchants; diagnosed B2B integration bugs across partner platforms to eliminate merchant churn.

- **Technical Advocacy & Defect Clustering:** Designed automated ETL pipelines to cluster integration defect patterns, turning developer feedback into platform fixes that reduced integration churn.
- **SDK & Integration Debugging:** Diagnosed and resolved complex JavaScript, REST API, and webhook integration defects across major platforms (Shopify, Magento, WooCommerce, Salesforce Commerce Cloud).

Lead Software Engineering Immersive Resident | Galvanize Inc

San Francisco, CA | May 2019 – Aug 2019

- **Developer Mentorship & Code Review:** Directed technical onboarding and code evaluation for cohorts of ~20 incoming Hack Reactor students, delivering multi-repo reviews in full-stack JavaScript and Git workflows.

Experience Development Specialist & Prototyping Studio Coordinator | The Tech Interactive

San Jose, CA | May 2017 – Jan 2019

- **Google Partner Engineering & Creative Automation:** Partnered directly with Google to design sensor API workshops for 400+ visitors; engineered generative digital signage in JavaScript (p5.js) to automate workshop scheduling (Monthly Innovator Award).

Design Code Build Instructor | Computer History Museum

Mountain View, CA | Mar 2017 – Nov 2018

- **Technical Education & Physical Computing:** Guided 1,000+ students and volunteers through software logic and physical computing workshops (Rube Goldberg machines), adapting complex computing concepts for diverse audiences.

EDUCATION

- **Deep Atlas** | Residency, Applied AI and Machine Learning
- **Northwestern University** | Graduate Coursework, Learning Sciences
- **Olin College of Engineering** | SEER Program (Summer Engineering Education Research)
- **Hack Reactor** | Advanced Software Engineering Immersive
- **University of California, San Diego** | B.S. NanoEngineering – Cum Laude

SKILLS & TOOLKITS

- **Technical Toolkit:** Python, JavaScript, React, Next.js, Node.js, Flask, PyTorch, LLMs & RAG, Agentic Coding Frameworks (Claude, Cursor, Antigravity), Snowflake, SQL, ETL Pipelines, SRE Support, Vercel, Git/GitHub, CI/CD, REST APIs, Webhooks
- **Leadership & Management:** Team Scaling (1 to 9 engineers), Performance Management, Cross-Functional Alignment (Product, Design, Account Management, Ops), Mentorship & Coaching, Psychological Safety, Paved Paths & Engineering Velocity (Velocity Labs), Written RFCs & Architectural Decisions, Sprint Orchestration, Incident Management (MTTR reduction)
- **Product & GTM Strategy:** Developer Advocacy & Evangelism, Partner Engineering, Enterprise Merchant Integrations (\$10B+ GMV Scale), GMV Attribution & Revenue Acceleration, Merchant & Partner Enablement, Field Research & Customer Discovery, Community Architecture
